Please find below and/or attached an Office communication concerning this application or proceeding.

Notification of Non-Compliant Appeal Brief (37 CFR 41.37)		Application No.	Applicant(s)					
		10/784,090	BONK ET AL.					
		Examiner	Art Unit					
		Walter B. Aughenbaugh	1794					
The MAILING DATE of this communication appears on the cover sheet with the correspondence address								
The Appeal Brief filed on <u>15 August 2007</u> is defective for failure to comply with one or more provisions of 37 CFR 41.37.								
To avoid dismissal of the appeal, applicant must file anamended brief or other appropriate correction (see MPEP 1205.03) within ONE MONTH or THIRTY DAYS from the mailing date of this Notification, whichever is longer. EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136.								
1. 🔲	The brief does not contain the items required under 37 CFR 41.37(c), or the items are not under the proper heading or in the proper order.							
2. 🗌	The brief does not contain a statement of the status of all claims, (e.g., rejected, allowed, withdrawn, objected to, canceled), or does not identify the appealed claims (37 CFR 41.37(c)(1)(iii)).							
3. 🗌	At least one amendment has been filed subsequent to the final rejection, and the brief does not contain a statement of the status of each such amendment (37 CFR 41.37(c)(1)(iv)).							
4. 🛚	(a) The brief does not contain a concise explanation of the subject matter defined in each of the independent claims involved in the appeal, referring to the specification by page and line number and to the drawings, if any, by reference characters; and/or (b) the brief fails to: (1) identify, for each independent claim involved in the appeal and for each dependent claim argued separately, every means plus function and step plus function under 35 U.S.C. 112, sixth paragraph, and/or (2) set forth the structure, material, or acts described in the specification as corresponding to each claimed function with reference to the specification by page and line number, and to the drawings, if any, by reference characters (37 CFR 41.37(c)(1)(v)).							
5. 🗌	The brief does not contain a concise statement of each ground of rejection presented for review (37 CFR 41.37(c)(1)(vi))							
6. 🗌	The brief does not present an argument under a separate heading for each ground of rejection on appeal (37 CFR 41.37(c)(1)(vii)).							
7.	The brief does not contain a correct copy of the appealed claims as an appendix thereto (37 CFR 41.37(c)(1)(viii)).							
8.	The brief does not contain copies of the evidence submitted under 37 CFR 1.130, 1.131, or 1.132 or of any other evidence entered by the examiner and relied upon by appellant in the appeal , along with a statement setting forth where in the record that evidence was entered by the examiner, as an appendix thereto (37 CFR 41.37(c)(1)(ix)).							
9. 🗌	The brief does not contain copies of the decisions rendered by a court or the Board in the proceeding identified in the Related Appeals and Interferences section of the brief as an appendix thereto (37 CFR 41.37(c)(1)(x)).							
10.🛛	Other (including any explanation in support of the above items):							
	See Continuation Sheet.							

Continuation of 10. Other (including any explanation in support of the above items): Fig. 3 does not show a multilayer film, so it is unclear whether or not the top film and the bottom film of membrane 28 (as shown in Fig. 3) each comprise the claimed first and second layers or if one of the films corresponds to the first layer as claimed, and the other film corresponds to the second layer as claimed (so it is unclear whether or not the embodiment shown in Fig. 3 corresponds to the claimed invention, and if it does correspond to the claimed invention, it is unclear how it corresponds to the claimed invention): Fig. 4 and 5 (which do show a multilayer film) are not described on page 18 of the specification as showing the membrane 28 shown in Fig. 3, rather, page 18 of the specification suggests that Fig. 4 and 5 show a different embodiment of the membrane 28 of the invention from that shown in Fig. 3 (or that Fig. 4 and 5 show an embodiment that is not required for the membrane 28 that is shown in Fig. 3). Furthermore, the structures of the membranes shown in Fig. 3 and Fig. 4 are different (Fig. 3 shows closed ends, while Fig. 4 shows open ends), which indicates that Fig. 4 does not show the membrane shown in Fig. 3, and therefore that Fig. 3 does not show a multilayer film.
